

Input provisional volume information for mix-prepacked unit by Cargo Agent

This enhancement is mainly aimed to provide a facility for the cargo agent to input the provisional volume information for the shipments in the mix-prepacked unit after the cargo is accepted by Hactl.

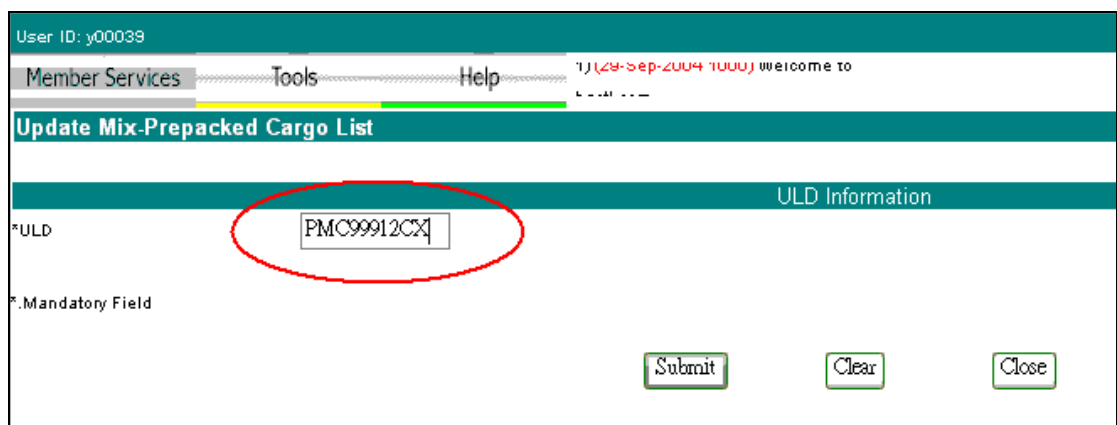

Sample Process Steps

1. Select the function, namely 'Update Mix-Prepacked Cargo List' in Hactl.com.

2. Input the corresponding unit serial number of your desired mix-prepacked unit and then press the 'submit' button.

Sample input screen:

The screenshot shows the 'Update Mix-Prepacked Cargo List' input screen. The user ID is y00039. The page title is 'Update Mix-Prepacked Cargo List'. The 'ULD Information' section contains a text input field for the ULD serial number, which is circled in red and contains the value 'PMC99912C2X'. Below the input field, there are three buttons: 'Submit', 'Clear', and 'Close'.

- Then, user is required to input the provisional volume of each individual shipment in the mix-prepacked unit and press the 'Submit' button to confirm the transaction. The maximum number of decimal places of volume is 2 and the minimum value of volume should not be less than zero.

Sample input screen:

| Air Waybill Information | | | | | | |
|-------------------------|----------------|---------------------|---------------------|----------------------------------|----------------------------------|-----------------------------------|
| Air Waybill | Received Piece | Received Weight(Kg) | Received Volume(MC) | Provisional Piece | Provisional Weight(Kg) | Provisional Volume(MC) |
| 160-32775906 | 100 | 1.0 | 1 | <input type="text" value="100"/> | <input type="text" value="100"/> | <input type="text" value="5.55"/> |
| 160-37741432 | 100 | 1.0 | 1 | <input type="text" value="100"/> | <input type="text" value="995"/> | <input type="text" value="5.2"/> |

- If the provisional volume of the shipment has already been confirmed by airline, a message will be prompted on the screen to alert the agent user that no more updating is allowed.

Sample output screen:

| Air Waybill Information | | | | | | | |
|-------------------------|--------------|----------------|---------------------|---------------------|-------------------|------------------------|------------------------|
| Sequence | Air Waybill | Received Piece | Received Weight(Kg) | Received Volume(MC) | Provisional Piece | Provisional Weight(Kg) | Provisional Volume(MC) |
| 1 | 160-32775906 | 100 | 1000.0 | 5.55 | 100 | 1000.0 | 5.55 |
| 2 | 160-37741432 | 100 | 995.0 | 5.2 | 100 | 995.0 | 5.2 |

Remark: Airline confirmed provisional piece and weight. No more updated allowed.
