

Declaration of 'e-Freight/HK e-AWB' shipment for export Mix-Prepacked shipment

This enhancement is mainly aimed to cope with the 'e-Freight/HK e-AWB' project. After the implementation, the authorized member users would be allowed to declare an export mix-prepacked shipment as 'e-Freight/HK e-AWB' shipment via Hactl.com member services function, namely 'Update Mix-Prepacked Cargo List', after cargo acceptance.

- 1.1 User is required to input the ULD number via the function, namely 'Update Mix-Prepacked Cargo List'.

Sample input screen:

Update Mix-Prepacked Cargo List

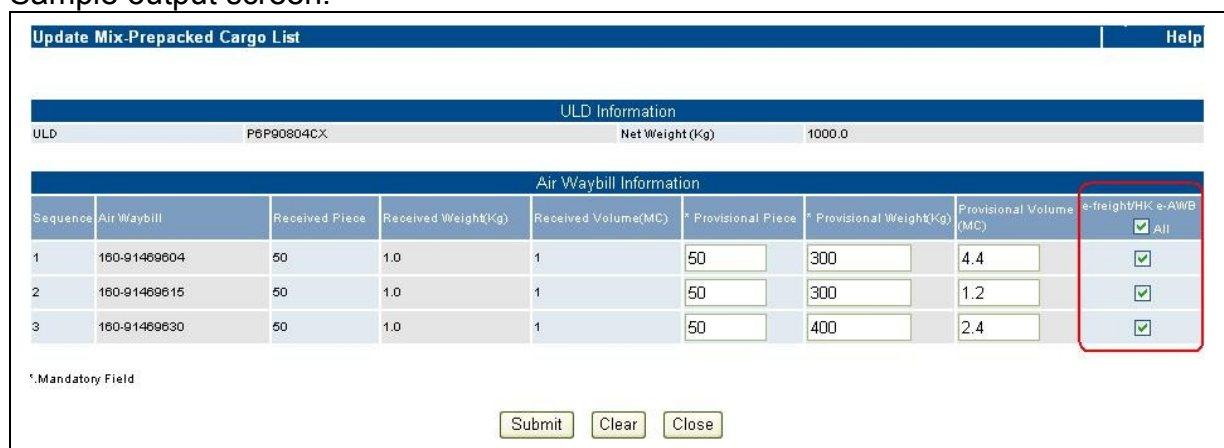

ULD Information

*ULD:

*.Mandatory Field

- 1.2 If the shipment is required to declare as 'e-Freight/HK e-AWB' shipment, user should tick the checkbox which is provided in the screen. Most importantly, all of the provisional piece/weight/volume information MUST be input accurately.

Sample output screen:

Update Mix-Prepacked Cargo List Help

ULD Information

ULD: P6P90804CX Net Weight (Kg): 1000.0

Air Waybill Information

Sequence	Air Waybill	Received Piece	Received Weight(Kg)	Received Volume(MC)	* Provisional Piece	* Provisional Weight(Kg)	Provisional Volume (MC)	e-Freight/HK e-AWB
1	160-91469604	50	1.0	1	<input type="text" value="50"/>	<input type="text" value="300"/>	<input type="text" value="4.4"/>	<input checked="" type="checkbox"/> All
2	160-91469615	50	1.0	1	<input type="text" value="50"/>	<input type="text" value="300"/>	<input type="text" value="1.2"/>	<input checked="" type="checkbox"/>
3	160-91469630	50	1.0	1	<input type="text" value="50"/>	<input type="text" value="400"/>	<input type="text" value="2.4"/>	<input checked="" type="checkbox"/>
